

WAW - LAUNDRY SOFTENER

DESCRIPTION

WAW is an industrial concentrated antifungal fabric softener that contains lubricating ingredients that help coat and soften fibers in your fabrics when added to your laundry load. The softener reduces wrinkles, prevents static build-up, and leaves a fresh, lavender scent with softer clothes. The product is presented in three different aromas and colors: Apple – Light Green color with apple scent, Lavender – Dark Blue color with lavender scent and Pink color with Baby scent.

USES OF THE PRODUCT

WAW laundry softener added to your laundry wash load will improve fabric quality and prevent color fading. This powerful softener dissolves quickly and maintains your fabrics in optimal condition. The ingredients in the softener are deposited onto fabric fibers to help fight wrinkles, reduce static and add a soft touch and fresh scent to your laundry. In general, fabric conditioners will enhance the durability of fabrics and reduce friction during the laundering procedure and help them to feel wonderfully soft and smell beautiful.

PRECAUTIONS AND RECOMMENDATIONS

- WAW Laundry Softener is a lubricating softener and is non-toxic, non-flammable and Biodegradable and should be used following Safety Instructions.
- The product is of normal (non-delicate) use, and it is recommended to use neoprene gloves for prolonged exposure to hands and skin.
- The product will not cause skin irritation as it contains humectants.
- Should the eyes be exposed, it will cause irritation. Rinse with water for 15 minutes and if irritation persists, consult with a doctor.
- Do not ingest, if ingested do not induce vomiting, seek medical attention.
- Use and maintain the product in a fresh, ventilated area.
- Keep out of reach of children and pets.

USAGE INSTRUCTIONS

- Arupro WAW fabric softener should always be added during the rinse cycle of the laundry wash, never directly on your clothes before the wash cycle. Most washing machines have a special compartment for fabric softener, where the softener should be added. If not, the conditioner can be added manually during the rinse cycle. Fabric softeners work best when they come into direct contact with the fabric. If you add it during the wash cycle along with your detergent, it might get washed away before it can coat your clothes. Fabric softeners are designed to complement your detergent, not interfere with it.

INGREDIENTS

Chemicals Cas No.

- Anti-fungal 8001-54-5
- Softener agents 139-07-1
- Humectants N/A

PHYSICAL AND CHEMICAL DETAILS

Appearance and odor _____ *semi-viscous liquid with: 1. Light green color with apple scent, and 2. purple color with lavender scent.*

Boiling Point _____ *>100 °C*

Solubility in Water _____ *Complete*

pH _____ *7.5 – 8.5*

Density _____ *1.01 – 1.05 g/mL*

Non flammable product
